

Adenoid Cystic Carcinoma Research Foundation

ACC PHYSICIANS LIST

Last Update: July 2009

Choosing the right doctor is a crucial decision. However, finding doctors experienced in treating adenoid cystic carcinoma (ACC) can be a challenge. In order to help ACC patients make an informed decision in selecting doctors, the Adenoid Cystic Carcinoma Research Foundation (ACCRF) offers this listing of physicians who have treated ACC patients. The substantial majority of physicians experienced with ACC are associated with academic medical centers where rare, complicated cases are typically referred. The names of physicians included in this listing have been provided by ACC patients.

The Physicians List is segmented by specialty (surgeon, radiation oncologist and medical oncologist) and then alphabetized by last name. Although each patient's situation is different, the current standard of care for newly-diagnosed ACC patients usually involves surgery followed by radiation. Systemic therapy (chemo and targeted drugs) may be suggested by medical oncologists if residual disease cannot be surgically removed or advanced metastatic disease is apparent. Ideally, a multi-disciplinary team of all three specialties will review the proposed treatment plan for each ACC patient.
